IGO FONTE NENTES!!

11 September 2015 Written by Rã © Gys Borges da Silvesira 11/09/2015 ACBR ABRB, installation, Trunk2 168 Comments on the topic is high, wrote a simple article on how to migrate from the trunk to Trunk2 of the ACBR, a well , a well -the focus step -by -step that can help those who are not yet emigrated. Removal of the ACBRA FRIEND Pass is to clean the old ACBR1 ACBR1 from Delphi, so we will do the following: Open Delphi and go to the Tools, Options, Library route, remove all directions directed by the list; Still in Delphi, so we will do the following: Open Delphi and go to the Tools, Options, Library route, remove all directions directed by the list; Still in Delphi, baixand Trunk2agora. Remove the ACBR1 ACBR from the computer from the computer And download a new ACBR2 ACBRO copy, follow these steps: make a backup of your old ACBR directory and delete it; Create a new folder with the name of your preference, for example "ACBR"; Click on click on with the right button of the mouse on this new A folder and click on the option is â. a " " checkout â. a duress: SVN: //svn.code.sf.net/p/acbr/code/ Trunk2. continue and wait until the checkout is finished; finished relationships in the trunk2 we will not have more the quantity of "engines" to worry, for Trunk2 we choose to do it, simple, now we can focus on a better quality with a lower range of "engines" to worry, for Trunk2 we choose to do it, simple, now we can focus on a better quality with a lower range of "engines" to worry, for Trunk2 we choose to do it, simple, now we can focus on a better quality with a lower range of "engines" to worry, for Trunk2 we choose to do it, simple, now we can focus on a better quality with a lower range of "engines" to worry, for Trunk2 we choose to do it, simple, now we can focus on a better quality with a lower range of "engines" to worry, for Trunk2 we choose to do it, simple activity, receive contributions and always be updated. Fast report, this is already the standard engine of Delphi at some time, then all the most recent versions of the Fort Report at:  $\hat{\phi}_{i}$  ctica/fortes report-ce, you can choose Download the .zip file for your computer Using  $\hat{A} \notin \hat{a}$ ,  $\neg$  a "Donwload zip $\tilde{A} \notin \hat{a}$ ,  $\neg$  a "Donwload zip $\tilde{A} \notin \hat{a}$ ,  $\neg$  a "Donwload the .zip file for your computer Using  $\hat{A} \notin \hat{a}$ ,  $\neg$  a "Donwload zip $\tilde{A} \oplus \hat{$ direction you are your strong, insert Na à ¢ â,¬ Å "Trunk Packagesà ¢ â,¬" Open the .dpk file for the version of your Delphi in the Project Manager, click again to the right and then at â,¬ Å "Compile â,¬; in Project Manager, click again to the right and then at â,¬ Å "Installiale â,¬, a message informed that the packages have been installed will be displayed; open the explorer and navigate towards the direction: A ¢ â, ¬ å "trunk Sourcean â, ¬, copy \* .dcr, \* .dfm, \* .res; browse the files of the binary folder, A folder with your Delphi name is created inside the previously copied files ready; its strong is installed and functioning. Important: we do not fulfill support or maintenance at the fort, then use the Fortes A website GitHub, open a ticket using the option A ¢ â, ¬ Å "IssueA ¢ â, ¬ of github. Installation of the trunk2 earlier, everything is very simple because we have a wonderful tool called acbrinstall that does everything for no. In our fan, we have a vibrant and committed community that produces hundreds of new messages every day. They are: sinapsi.dpk, acbropenssl.dpk, acbropenssl.dpk codes are with the latest version or with the current version of the ACBR. Figure 8: Show how to fill out the Sinapsi.bpl packages are only execution time and, therefore, should not be installed in the IDE, but only compiled to generate the BPL file. Repeat this step for all packages, some packages contain more than one component, the message contains more elements. This site uses Akismet to reduce spam. Figure 5: shows the window for browsing between the directives. Some dances my e-mail: wllflf@ig.com.br. All the components are compatible with Delphi and Lazarus. To run this Open Delphi IDE and click on the menu - Tools> Options> Item: Library - Win32, the Options window will be displayed as shown in Figure 3 on the Library path Click the A<sup>-</sup> A<sup>1</sup>/<sub>2</sub> button, another will be informed. Read more about our portal ... After completing all installations Close all the projects and in the message that will be displayed, asking if you want to save projects, click No. I demonstrated in this article because it could be easy to install This ACHBR component clapper, which make deppi developer screws much easier. Good staff, showed in this article because it could be easy to install the ACBR component clapper, which make deppi developer screws much easier. for non-developers, some: creation, valid Â<sup>1</sup>/<sub>2</sub> or NFE sending, filling numeric values of extensive, query of the CEP via WebServices, opening and closing of cash registers and AÃ<sup>-</sup>Â<sub>2</sub>Â<sup>1</sup>/<sub>2</sub>... There are other types of bookmarks as: modified, exclusive Å<sub>2</sub>Â<sup>1</sup>/<sub>2</sub>A, etc ... help, how to download, install and update L 'ACBR A Only customer customers Which bought this product can leave an evaluation. All ACBRA sources are code, to access it you need to use SVN and configure the SVN address: a //svn.code.sf.net/p/acbr/code/trunk2 it is recommended to analyze the examples to know the whole Resources offered by each component. Within this folder are all the packages that we will compile, these files have the .DPK extension, it will be a little laborious, but we will select one package at a time. Figure 3: Show the options window. Find out how your comments are processed. Figure 3: Show the arrangement of the sub-directors from the ACBR folder. If everything is fine, a message confirming the installation is displayed, in this example the tacbubletote component was installed as shown in Figure 11. Abraomos .... to install this first component on the â Site: this is detailed the entire process to download the Svn first (an alternative to always have the last verse (development)) and then the ACBR packages, one of the advantages of Svn is that creates the correct structure of administrators and subdirector of the sources, another advantage is that we can always update the packages with the latest version issued. I prefer to copy the folder created in the Dainphi Directory. Click the right button on the top of the package and select the compile option, if everything is fine until the end, click OK. Figure 1: View the organization of the folders in the Root Delphi 2010. After the download and installation of Syn, we will create a folder with the name ABRR and we will inform the Syn that in this folder. Optionally, you can use the SVN: //syn.code.sf.net/p/acl/code line and download tags e SVN marks folders. based on their update. The commercial automation project of Brazil, in Somosi, is a set of sources, components and programs intended for the development of the application of the application segment and distributed in the open (free) regime. Run the ACBRINSTALL TRUNK2.EXE which is the root of the direction where you have downloaded the TRUNK2 ACBR, a step-by-step installation will be started that will guide us from the ACBR project, after this click Å ¢ â, ¬ "Coximoà ¢ â,¬; configure our installation to see if the installation direction is correctly informed; Only the option - only the libxxx folder in the library path â,¬ if you want to use only the compiled files; check the options à ¢ â,¬ so that l 'installation copies the dlls to opensll and other requested for windows system; click à ¢  $\hat{a}$ ,  $\neg$  å "coximo" the selection of the screen of what will be installed marks everything that wants to be installed, remembering that acbrnfse and acbernd is not yet completely transp vegetable, then  $\hat{a}$  f or mark because errors can occur during installation if they are marked, enjoy and choose the " $\hat{a}$ " impression engines you want to use, click  $\tilde{A}$  ¢  $\hat{a}$ ,  $\neg$   $\hat{A}$ "Inximon as we have Download a new replacement tab to avoid updates, click again at â, ¬ å "finally click on à ¢ â, ¬, all packages will be compiled and added to Delphi; Once the compilet, click A ¢ â, ¬ Å "IR. The simple to solve and usually has to do with impression, the most of the time the user marks one and has not been installed, in any case the project of the Acber project is that our friend is always that there are people willing to help, just consult it, before opening A new topic to do a search and if you don't find anything, open a new topic to that we will have the pleasure of helping. The main differences between trunk1 and trunk2a The main motivation to make trunk2 acbra was the restructuring of the project in all, making it more object-oriented, more structured, flexible, expandable and easy maintenance, as in all changes, some healthy rotten eggs, so some things you are used to are different, nothing that will make your project "incompilavel", but this should be revised with affection and attention, the main amendment are: some units have been renamed to facilitate the understanding of what they do And separating who is from who, avoiding the mix that the old trunk has promoted, some months have been renamed for standardized names and following the nomenclature of Design and Delphi, as A ¢ â, ¬ Å "vandeventoA ¢ â, ¬. The need for cast, just access the ACBRNFE (ACBRNFE (ACBRNFE (ACBRNFE)) SSL property; Sending e-mail is all based on the ACBRNFE (ACBRNFE) (ACBRNFE to it, this is interesting because now it is just set the Component ACBRMAIL Once and all the components connected to it will be able to send e-mails normally; The impression of the tests in the printers NOT Taxes now has a new component, the Acberros Support Printer and Configurations required in all printer models No More common market, by connecting it to other components it is possible to print directly to non -instant printers in a very fast and highly configurable way, also accepts the network printing by the IP address, very useful in environments with a printer not tax with Ethernet port; Many improvements have been made and everything is in production a few months, I don't need to be afraid of the stability. I use Trunk2 in a manufacturer at about 4 months, for those who wish to continue using the trunk1 is the message, the support for It has been extinct from the nucleus of the ACBR project at about 3 months, so it is not updated, those who continue to use long-term can have problems, the NF-and is an example if there is a change change change of services Web, like the one that occurs on 01/10/2015 Next Upter or virtual machine, install Delphi or Lazarus and Trunk2 ACBR on this computer, do all the migration and test with calm, study the ACBRE demo, consult the drug, the migration Made, test internally and enter 1 or 2 customers, when the migrated version, when you are fully sure that your software is 100% to the SI updates all your customers and stop using Trunk1 ACBR.MOR. Is widely discussed in the pro fan Jet ACBR, just consult, surely you will find what you are looking for in the path and can put an end to your migration calmly. A message for all ACBR users who read the article contribute somehow, both with a code, which respond to doubts in the brother or even signing our ACBRSAC, today our larger problem and not owning a dedicated group dedicated free time when always try to improve it, with help ACBSAC subscriptions We can keep the programmers full-time that make changes and improvements faster, we think of this, helps, if you stop thinking that the ACBR will bring much more back than the accused of ACBSAC, think of this. I hope that this small article can help everyone and so soon everyone can enjoy and share .Rata: the URLs I mentioned were also updated in the Luggage room1, as some users still use trunk1, we find it well updating the URLs on it so that it does not generate any important problem. Figure 9: Displays the compilation result. There are many results on installing these packages that I have already had many problems at the beginning, which today I see that they are not complicated there. I prefer first to select the packages that are not installed, but they are compiled. Figure 10: shows how to install the selected component. Now let's start installing the packages, in the Delphi IDE click on the file> Open the project menu, you will see a window to inform which project we want to open, go to the ACBR folder Delphi in my if you are: C: Programs Embarcadero RAD Studio 7.0 Acber packages Delphi. Complete all packages from the Delphi folder, after completing this phase we will install the components, it is very simple, just right-click on the package and select the installation option, always remembering that these packages (Sinapsi.dpk, PCN . DPK, ACBRESESSL.DPK, ACBRESESSL.DPK, ACBRCAPICOM.DPK) cannot be installed but are compiled. Figure 4: shows the directory window, where the path of the sources of codes will be informed. Figure 4: shows the directory window, where the path of the sources of codes will be informed. THE BRANCHES folder, IN VERSIONS IN IN Not yet stable. Offering! Closing of the previous product R \$ 30.99 R \$ 19.99 Generation with PDV equipment such as ECF, printers, code readers, electronic signs, balance and drawers; PAF-ECF implementation included Tef, generation of files and encrypted signature required by legislation o; Generation and printing of tickets; Implementation such as tax codes, IBGE codes, NCMS, edevies the components to improve performance or add intrinsic resources to commercial automation. The installation is not complicated, but requires some harmless details, how to inform the path of the sources in Delphi, this initiative considerably reduces the number of errors during installation, usually perform this process after installation is not complicated. installing the packages. Figure 11: shows the conclusion of the installation. The context of our faith is a great basis of knowledge and responses, being referring to the internet investigations on commercial automation. In the Directors window click on the button with the image of a folder, a navigation window showed in Figure 5, navigates through the directives to reach the ACBR folder, inside there is a subcartella called font and in different Separate folders, click on the first folder, then press the OK button in the directory window Pres and window of the Options. For further details, access the Set Settings property. 99 Marca brand description (0) If you are a PASCHAL developer, you can choose to use the ACHBR component suite directly in the applications and take the use of it. With this I finish another article I hope you have appreciated and at the age. Before.
