

聖類斯同學會(SLOBA)旨在團結聖類斯校友，以及凝聚校友們的力量以支持母校的各方面發展。本同學會每年均舉辦多項不同類型的活動，包括職業講座、師友計劃、田惠民神父成就獎、專題聚餐、「夫子盃」乒乓球比賽等，以促進校友間的交流及回饋母校。

1. 職業講座

本會邀請不同專業領域的校友與學生分享工作經驗及心得，讓同學了解各行業的工作性質及前景，從而確定自己升學及就業的取向。

2. 師友計劃

本計劃的重點活動是為高中同學提供大學入學模擬面試。去年，有約六十位校友及百多位學生參與其中。出席的校友來自不同專業領域，包括律師、醫生、會計師、工程師、導演、企業家等，他們跟學生分享選科心得及面試技巧之餘，亦可讓矢志於不同發展方向的同學可進一步了解該行業的工作特質及所需具備的條件。

3. 田惠民神父成就獎

田惠民神父的教學理念是鼓勵學生多參與課外活動以達致全人發展，為此，本會特設此獎項表揚在課外活動表現出眾的學生。

4. 「夫子盃」乒乓球比賽

每年一度的「夫子盃」為校友提供交流平台，讓他們與現屆乒乓球隊隊員切磋球技，增進師兄弟間的友誼。

5. 專題聚餐

專題聚餐可說是校友們每年不可錯過的活動。不同年代的校友藉此聚首一堂，除有校友作專題分享外，大家亦會輪流細說昔日校園生活軼事及不同生活經歷。

6. 聖類斯同學會學長團

本校自1966年起成立學長聯會，而「聖類斯同學會學長團」的成員為歷屆學長聯會領袖，他們定期舉行聚會，為學長聯會提供領袖訓練，提升學生的領導才能。

聖類斯同學會會一如以往透過強大的校友網路和集體智慧支持學生、校友以及學校的整體發展。

The St. Louis Old Boys' Association (SLOBA)

aims to promote solidarity among St. Louis old boys and muster fraternal support to cater for the development needs of our school. As an act of expressing our gratitude and solidarity, a variety of programs have been organized by SLOBA annually, namely career talks, mentorship program, Fr. Deane Achievement Award, Warm Table Dinners and Fu Tsz Table Tennis Competition.

1. Career Talks

We invite a number of old boys from different walks of life to hold talks about the professions and share their working experience in different sectors. This can gear the senior students better by offering advice to their choices of study and career prospects ahead.

2. Mentorship Program

A highlight to our mentorship program is the mock interview. Over 110 students and 60 mentors from various professions such as accountants, doctors, lawyers, engineers, directors and entrepreneurs were involved in the program last year. Through the interview, our senior students can have a better grasp of the job nature and the requirements for different professions.

3. Fr. Deane Achievement Award

Fr. Deane's education philosophy is to encourage students to develop all round capabilities by participating in extra-curricular activities. This award is set up to recognize students with outstanding performances in extra-curricular activities.

4. Fu Tsz Cup Table Tennis Competition

The annual Fu Tsz Cup Table Tennis Competition would be a great platform to hone table tennis skills, and to foster connection between current St. Louis Team members and their elder brothers.

5. Warm Table Dinners

Warm table dinners could be regarded as a must-attend annual event for fellow Aloysians. Our old boys from different graduation years are pulled together. Other than a keynote sharing made by an invited guest, the dinner itself is a light-hearted occasion for the old boys to reminisce their good old days in school and their assorted life experiences.

6. SLOBA Aloysian Fellowship

Prefect Association was founded in 1966. SLOBA Aloysian Fellowship, represented by headboys in the previous years, gathers regularly to provide leadership training to the Prefects Association of St. Louis.

SLOBA will strive to support the development of our students, old boys and our Alma Mater through our extensive network and synergy from our fellow members.

St. Louis School – Yale University

Sung Laboratory Internship Award

聖類斯中學耶魯大學

宋氏實驗室暑期研習班

Prof. Patrick Sung 宋明華教授

Professor Patrick Sung, a St Louis graduate in 1976, is now serving as Head of the Department of Biochemistry at Yale University School of Medicine. The Biochemistry Laboratory was named after him in honour of his contributions to the university. Specializing in DNA research, the laboratory is home to many renowned scientists of different nationalities. Elizabeth Blackburn, the winner of Nobel Prize in Medicine, is an active researcher in the department.

Professor Sung not just commits himself to medical research, he is also grateful to his Alma Mater. It was then St Louis School – Sung Laboratory at Yale University Summer Internship program set up with an aim to broaden our students' horizon by offering them an exchange experience at Yale University.

Last year, two form-six students, Sam Wong and Brenton Ng, were chosen to be the summer interns. They had a rare encounter with many world-class biochemists at Sung Laboratory and savored a bit of vigorous research work. Thanks to the sponsorship from a group of old boys, each of them received a sum of HK\$30,000 for their travelling expenses. In their stay, they were welcomed by the family of Professor Sung, who once treated them with hospitality and helped them settle there.

Though Professor Sung had been a graduate for decades, his gratitude to our school still lingers. This is a true life example to illustrate our precious school mission – Been here, Pay back here. We are now arranging summer internship program in the coming year. Grab a chance to broaden your world perspective!

宋明華教授是聖類斯中學 1976 年的畢業生，現任美國耶魯大學醫學院分子生物物理與生物化學教授。宋教授多年來在 DNA 科研的領域上貢獻甚大。為表揚他的成就，耶魯大學將其研究所命名為「宋氏實驗室」。宋教授所屬的生化系雲集各地科研精英，諾貝爾醫學獎得主 Elizabeth Blackburn 亦是其中一員。

宋教授除了致力提升醫學研究水平，亦樂於回饋母校。故此，宋教授特意籌辦「聖類斯中學—耶魯大學宋氏實驗室暑期研習班」，保送學弟到耶魯大學進行交流，令他們能擴闊閱歷。

去年，本校挑選了兩名中六學生—黃梓皓同學及吳永業同學到美國耶魯大學進行交流，並到「宋氏實驗室」觀摩研習，體驗科研人員的研究生活。是次活動獲本校校友們鼎力支持，他們為兩位學生籌集得六萬元作旅費。在美國期間，宋教授更誠邀二人到其家中作客，為他們安排食宿。

宋教授畢業多年，仍不忘回饋母校，足以體現本校可貴的教育理念。本校現正籌備來年的暑期研習班，希望秉承「生於斯，饋於斯」的宗旨，並幫助同學拓闊視野。
